

November 25th 2021
Final Exploitation event of
EU project CarE-Service

This Exploitation Event aims to show the final and interesting results of the European funded project CarE-Service which is focused on new business models for the value chains derived from the end of life phase of the new electric and hybrid vehicles.

During the 42 months of the project, various products, services, processes and methods of great interest for the automotive business were developed with the aim of showing the emerging and promising business opportunities that go beyond the traditional combination of production and distribution.

Agenda

09:30 - 09:45: *Introduction, STELLANTIS & CNR*
